

# FLO... the one-stop shop for Care delivery

## The Big 3

**1** Ease of use - user friendly interface with display design targeted to individual roles

Dashboard views designed for the management of workflow, reporting and personalisation to support your day to day role

**2**

**3** Microsoft platform allowing other MS capability to be easily integrated

### Current Programmes using FLO

- Cornwall
- Lincolnshire
- Cambridge & Peterborough
- Norfolk
- Lancashire

### Why they think they don't want it... And why they do!

**"We already have an internal system to manage our workflow" (MS Planner)**

FLO workflow management system will deliver automation to the tasks that create repetition allowing our teams to work more productively. It also brings increased governance to the data that we handle.

### Who would love this?

- Care delivery teams including Delivery Leads and Delivery Managers
- Head of PMO and Programme Managers
- Senior Leadership Team

### What makes this different?

- The creation of a one stop shop for delivery interaction
- One source of information creating accurate reporting both internally and external
- The ability to customise to meet business growth

### Want more info?

Check out our brand new space in Liaison Library for all information on FLO including user guides, FAQ's, and much more!

### User story

"I started using FLO as part of the Cornwall project which was the first to go live. FLO is certainly more user friendly than Teams (Planner).

It has cut down on the use of spreadsheets and has everything that is needed to book a review/assessment in one place. It has taken the more manual aspects of the PWC job away and when the full rollout is complete, it will be a one stop shop for PWC's/Practitioners and PMO."
