

# CHC Review Partnership. **Delivered.**

A collaborative approach to enhancing Efficiency and Care Quality

“ While working with Liaison, my task has been reviewing clinical assessments to ensure that the work contracted by the ICB is of high quality. I have found assessments to be thorough, well-written and comprehensive, providing a clear picture of the patient's condition and needs. The assessment captures all the necessary information needed to make a clinical judgement on changes in the Care package and presenting health needs.

This task, along with the assistance of Liaison, has enabled the ICB to ensure that individuals receive customised Care, which in turn, helps to maintain or improve their health outcomes. Additionally, it provides ICB with the assurance of efficiency and cost-effectiveness.

**Jennifer Khuweis, Learning Disabilities and Mental Health Clinical Lead**

“ The foundation of any thriving relationship lies in the dedication to understanding and supporting each other, and one of the standout qualities of our collaboration is the consistent and effective communication we've maintained throughout the relationship.

Regular updates, prompt responses, and a shared commitment to keeping each other informed have been instrumental in the delivery of our projects.

**Sally Dore, Assistant Director of Nursing and Quality**

Our Review activity provides insight into the consistency of eligibility decisions across an Integrated Care System, providing assurance and indications of variation.

Spend is incurred where individuals who are supported through the Funded Nursing Care Contribution become eligible for full Continuing Healthcare, or where needs have increased.

Efficiencies are made when individuals who are fully funded through Continuing Healthcare have presenting needs that can be met through Funded Nursing Care Contributions or alternative support arrangements, or where there is an evidenced eligibility change, or where the level of care package can be safely reduced.
