Our Review activity provides insight into the consistency of eligibility decisions across an Integrated Care System, providing assurance and indications of variation.

Spend is incurred where individuals who are supported through the Funded Nursing Care Contribution become eligible for full Continuing Healthcare, or where needs have increased.

Efficiencies are made when individuals who are fully funded through Continuing Healthcare have presenting needs that can be met through Funded Nursing Care Contributions or alternative support arrangements, or where there is an evidenced eligibility change, or where the level of care package can be safely reduced.
